

Living Things and Their Habitats - November Homework Tasks

Choose one per week - 4 tasks in total (week beginning 23/11 last one and hand in by 30/11 at the latest) Please tick off the ones you have completed.

<p>Cooking: Can you create a feast for the wildlife in your garden?</p> <p>https://www.edenproject.com/learn/for-everyone/make-your-own-bird-cake-for-the-garden</p>	<p>How many habitats? Visit your local woodland and take a picture - then label all the different species that you would find in that particular picture. How many animals do you think live in that particular area?</p>	<p>Make a model of an animal's habitat - maybe use a shoe box. Remember to include what it likes to eat.</p>	<p>Research Carl Linnaeus. You can present your findings however you choose – be creative!!</p> <p>You might want to start by looking at this short video.</p>
<p>What is metamorphosis? Can you give some examples?</p> <p>Draw the life cycle of an insect and an amphibian to show the stages of their transformation.</p> 	<p>Choose an area in your local environment to study. This might be the local park or a neighbourhood walk. Create a tally chart to record which trees are present in your local environment. When you have finished create a bar chart to show your results.</p> <p>The Woodland Trust have a great free app which you can use to help identify British trees.</p> 	<p>Research the plants and animals that live in a rainforest.</p> <p>Create food chains or food webs to show how the energy is transferred.</p> 	<p>Vertebrates are animals with backbones. These animals are split into 5 groups: reptiles, birds, fish, mammals and amphibians</p> <p>Choose one of these groups of animals and research the main characteristics. You could present your findings in Word, PowerPoint or make a poster.</p>
